

FORM STRUCTURE — 4 PHASES, 18 QUESTIONS

Show a phase label above the question number (e.g., "Phase 1 — Relationship with AI") as a small muted badge. Phase transitions should feel like a chapter change — a brief full-screen flash or color pulse.

PHASE 1 — RELATIONSHIP WITH AI

Q1 — Are you AI literate? Single choice:

- Yes
- No

Q2 — How often do you use AI? Single choice:

- Always
- Sometimes
- Rarely
- Never

Q3 — What do you use AI for? Multiple choice (select all that apply):

- Writing emails and replies
- Summarizing long meetings
- Finding info in big files
- Sorting through job applications
- Analyzing data and numbers
- Creating social media posts
- Writing code or Excel formulas
- Coming up with new ideas
- I don't use it for work yet

Q4 — What conversational AI tools do you use? Multiple choice (select all that apply):

- ChatGPT
- Microsoft Copilot
- Google Gemini
- Claude
- Perplexity AI
- Poe
- Jasper
- Custom or Internal AI Company Bot
- Other
- None

Q5 — What is the size of your company? Single choice:

- 1–10 employees
- 11–50 employees
- 51–250 employees
- 251+ employees

Q6 — What is your current job title? Single choice:

- CEO / Founder
 - CIO / CTO / Head of IT
 - CHRO / Head of HR
 - CFO / Head of Finance
 - COO / Head of Operations
 - Director / Head of (other function)
 - HR Manager / L&D
 - Operational Manager
 - Other
-

PHASE 2 — AI TODAY

Q7 — What are your current business challenges? Multiple choice (select all that apply):

- Finding and keeping the right staff
- Too much time spent on manual "copy-paste" work
- We don't have clear, daily reports on our performance
- Our sales pipeline is messy and hard to track
- Teams don't talk or work well together
- Rising costs are eating our profit margins
- It takes too long to get new employees started
- We are moving too slow compared to competitors
- Finding the right files or info takes too much time
- Other

Q8 — Have you considered AI as a solution to solve these problems? Single choice:

- Yes → show Q9
- No → show Q10

Q9 — (If Yes) How did you proceed? Single choice:

- Hiring a consultant
- Train your teams
- Investigate the topic

Q10 — (If No) What's preventing you from doing so? Single choice:

- Business readiness
- Budgeting in current financial year
- Lack of guidance

Q11 — How do you track or measure your business KPIs? Single choice:

- Excel spreadsheets
- Business Intelligence via tools (ERP-based systems)
- Fully automated reports with live dashboards

Q12 — In which industry is your organization active? Single choice:

- Technology & Software
- Banking & Financial Services
- Retail & E-commerce
- Manufacturing
- Healthcare & Life Sciences
- Education
- Professional Services (Consulting, Legal, etc.)
- Real Estate & Construction
- Hospitality & Tourism
- Energy & Utilities
- Other

Q13 — What are your top 3 business priorities today? Multiple choice (select up to 3):

- Profitability & Cost Optimization
 - Operational Efficiency & Automation
 - Digital Transformation & AI Integration
 - Talent Acquisition & Retention
 - Customer Experience & Loyalty
 - Market Expansion & Scaling
 - Sustainability & ESG Strategy
-

PHASE 3 — AI TOMORROW

Q14 — What decisions are currently difficult to make in your organization? Multiple choice (select all that apply):

- Budgeting & Financial Forecasting
- Strategic Expansion & Market Entry
- Pricing & Competitive Strategy
- Talent Acquisition & Hiring
- Resource & Workforce Allocation

Q15 — Do you plan to train your teams on AI usage in 2026? Single choice:

- Yes → show Q16
- No → show Q17

Q16 — (If Yes) What training themes do you want to cover? Multiple choice (select all that apply):

- AI Foundations: Getting the whole team comfortable with the basics.
- Prompt Engineering: Learning how to "talk" to AI to get perfect results.
- Automating Repetitive Tasks: Cutting out "copy-paste" work.
- AI for Sales & Growth: Using AI to find leads and close deals faster.
- Smart Data & Reporting: Turning messy spreadsheets into clear daily dashboards.
- AI in HR & Recruitment: Speeding up hiring and making onboarding easier.
- Financial AI & Admin: Saving time on invoices, bills, and paperwork.
- AI Safety & Policy: Ensuring your team uses AI securely and legally.
- AI for Content & Marketing: Creating high-quality posts and emails in seconds.
- Advanced Workflow Design: Building custom "AI employees" for specific departments.

Q17 — (If No) Why not? Open text answer (single textarea, styled beautifully — dark background, teal focus border)

Q18 — What are the must-haves of a solid AI training in 2026? Multiple choice (select up to 2):

- Hands-on practice: Actually building and using tools during the session.
- Real-world examples: Seeing case studies from my specific industry.
- Data Security & Privacy: Clear rules on how to keep company secrets safe.
- ROI & Business Proof: Training that shows exactly how it saves money.
- Ready-to-use "Prompts": A library of commands my team can use immediately.
- No-code automation: Learning how to connect apps (like n8n) without IT.
- Human-AI Culture: Helping staff overcome the fear of being replaced.
- Latest 2026 tools: Access to the newest models, not old technology.
- Post-training support: A roadmap or community to help us after the session.
- Executive alignment: Ensuring the boss and the team are on the same page.

PHASE 4 — CONTACT DETAILS

Show a friendly message before this phase: *"Almost done! Just a few details so we can send you your personalized AI Readiness Report."*

First Name — Text input **Last Name** — Text input **Email Address** — Email input (required, validated) **Phone Number** — Text input (optional)

Final screen after submit: Show a beautiful **"Thank You"** screen with a teal checkmark animation, the message: **"Your AI Readiness Report is on its way!"** and a subtext: *"Our team will be in touch with your personalized results shortly."*

CONDITIONAL LOGIC

- If Q8 = "Yes" → Show Q9, skip Q10
- If Q8 = "No" → Show Q10, skip Q9
- If Q15 = "Yes" → Show Q16, skip Q17
- If Q15 = "No" → Show Q17, skip Q16

SCORING LOGIC (INTERNAL — NOT SHOWN TO USER)

Calculate a running **totalScore** integer silently in the background as the user progresses.

Never display the score to the user at any point — not during the form, not on the thank-you screen, nowhere. No "points", no progress indicators linked to score, no scoring language in the UI whatsoever.

Send the final **totalScore** as a number to the **AI_Score** field in Airtable on submit.

Point values per answer:

Q1 — AI Literacy

- Yes → +10
- No → 0

Q2 — Frequency of AI use

- Always → +10
- Sometimes → +7
- Rarely → +3
- Never → 0

Q3 — What they use AI for (add points for each selected)

- Writing emails and replies → +2
- Summarizing long meetings → +2
- Finding info in big files → +5
- Sorting through job applications → +8
- Analyzing data and numbers → +10
- Creating social media posts → +2
- Writing code or Excel formulas → +10
- Coming up with new ideas → +5

- I don't use it for work yet → 0

Q4 — Conversational AI tools used (add points for each selected)

- ChatGPT → +5
- Microsoft Copilot → +5
- Google Gemini → +5
- Claude → +10
- Perplexity AI → +10
- Poe → +8
- Jasper → +8
- Custom or Internal AI Company Bot → +20
- Other → +5
- None → 0

Q5 — Company size → Unscored (0 pts, always)

Q6 — Job title → Unscored in total score (0 pts for totalScore purposes)

Q7 — Business challenges (add points for each selected — note: these are negative)

- Finding and keeping the right staff → 0
- Too much time spent on manual "copy-paste" work → -5
- We don't have clear, daily reports on our performance → -5
- Our sales pipeline is messy and hard to track → -5
- Teams don't talk or work well together → 0
- Rising costs are eating our profit margins → 0
- It takes too long to get new employees started → 0
- We are moving too slow compared to competitors → -3
- Finding the right files or info takes too much time → -3
- Other → 0

Q8 — Considered AI as a solution?

- Yes → +10
- No → 0

Q9 — How did you proceed with AI? (only if Q8 = Yes)

- Hiring a consultant → +10
- Train your teams → +5
- Investigate the topic → 0

Q10 — What prevents AI adoption? (only if Q8 = No)

- Business readiness → -10
- Budgeting in current financial year → -5
- Lack of guidance → 0

Q11 — How do you track business KPIs?

- Excel spreadsheets → 0
- Business Intelligence via tools (ERP-based systems) → +5
- Fully automated reports with live dashboards → +10

Q12 — Industry → Unscored (0 pts, always)

Q13 — Top 3 business priorities → Unscored (0 pts, always)

Q14 — Difficult decisions (add points for each selected — all negative)

- Budgeting & Financial Forecasting → -2
- Strategic Expansion & Market Entry → -2
- Pricing & Competitive Strategy → -2
- Talent Acquisition & Hiring → -2
- Resource & Workforce Allocation → -2

Q15 — Plan to train teams on AI in 2026?

- Yes → +5
- No → -5

Q16 — AI training themes → Unscored (0 pts, always)

Q17 — Why not training → Unscored (0 pts, always)

Q18 — Must-haves of a solid AI training → Unscored (0 pts, always)

Implementation note:

Maintain a `let totalScore = 0` variable. After each question is answered, add/subtract the appropriate points immediately. When the user goes **back** and changes an answer, subtract the previously added points and add the new ones. This ensures the score is always accurate at submit time.
